

W17

Ideal for rapid deployment, these digital widescreen satellite uplink vehicles are packed with facilities. Utilising fibre optic technology allows all of the production facilities for these vehicles including up to 4 full broadcast cameras, radio talkback and floor monitors to be rapidly deployed up to 2Km away from the production unit using just 2 small fibre cables. The production unit itself is equipped with camera control, a Snell & Wilcox Magic Dave vision mixer, Yamaha O1V audio mixing console, VT record replay facilities and a completely dual redundant satellite uplink.

SPECIFICATIONS

DIMENSIONS

Length 6.15m
 Width 1.99m
