

UNIT 25

Unit 25 is a six camera capable digital production unit with space for six VT machines. It is a medium sized production unit base on a Mercedes Vario chassis cab with a single expanding side to the left hand side. Combined with its all TFT multi viewer driven monitor wall this gives the unit a surprisingly spacious two row production area whilst still maintaining a small overall footprint. It is designed to be as flexible as possible and is equipped with up to 6 Sony camera channels, a Sony DVS2000 vision mixer and a Yamaha DM1000 audio mixing console. Unit 25 is equally suited to compact stand alone production or as an add-on to other units in the fleet.

SPECIFICATIONS
