

SIS 65

HD Capable Integrated uplink

SIS 65 is a self-contained, small footprint, high resource truck capable of delivering pitch side presentation; commentary position coverage; EVS analysis; IP services and uplink through its 1.8m dual thread system. It is a 2-tier single-expand vehicle with space for 7 production staff and 7 operators, as well as including a dedicated 3 person VTR area and has the added advantage of being operable without being expanded. This Rigid High Definition Production/Uplink Unit has a Mercedes chassis and is fully HD capable and 5.1 surround sound ready, as well as having the ability to carry its own equipment loads.
