

uBook

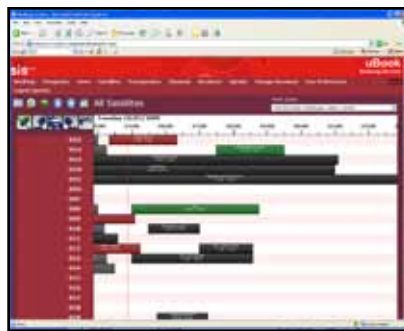

uPod uBook is a fully integrated booking system, that works seamlessly with any satellite capacity, enabling broadcasters to effortlessly provide live coverage on-demand with uPod uplinks.

Bookings are made using our secure uBook web portal. uBook gives the user flexibility and control of their uPods and ensures that client data is kept secure. Designed for integration with other systems it allows existing client scheduling packages to be used to control uPods directly.

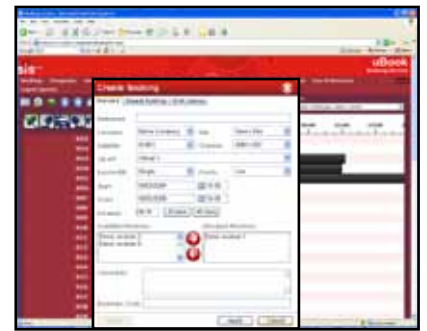

uBook is very simple to use yet it offers a wealth of features to make your life easy and gives the operator the freedom to work the cameras whilst uPod looks after itself.

1 Operator logs on to www.ubook.tv

2 Booking system shows satellite space available

3 Operator makes a booking

4 uPod goes to site

5 Operator deploys the system in two button mode

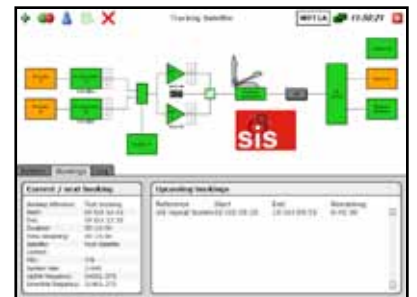

6 Truck picks up booking
